

'A Brief Primer' on water fluoridation/pollution Diane Drayton Buckland - 8 Oct. 2013

NO SAFETY DATA EXISTS

<http://fluorideinformationaustralia.wordpress.com/not-safe-not-effective/>

Dangerously corrosive hazardous waste pollutants fluorosilicic acid/silicofluorides and co-contaminants of lead, mercury, arsenic, cadmium, etc., (and added to this hazardous waste soup is aluminium sulphate) in our water supplies and hence through our food chain - we were not meant to consume in everything we eat, drink and bathe in these S6, S7 poisons/Corrosive 8 hazardous waste pollutants (waste from phosphate mining and aluminium smelting) and added also is aluminium sulphate.

After decades of water fluoridation /pollution Australia wide, (first commencing Beaconsfield, Tasmania in 1953 (Tasmanians also have worst dental health in the nation and population are chronically diseased) Australia is in dental crisis, as is the USA after up to 67 years of water fluoridation/pollution first commencing Grand Rapids, Michigan in 1945 (also in dental crisis). Kentucky is 100% 'fluoridated' and also in dental crisis and chronically diseased REPORT: 100% fluoridated Kentucky, USA - Rampant Dental Decay & chronic disease epidemic - DDB <http://fluorideinformationaustralia.files.wordpress.com/2013/01/rampant-dental-decay-chronic-disease-epidemic-in-100-fluoridated-kentucky-usa-13-aug-2013-ddb.pdf> which proves its an absolute shocking fraud, failure and is harmful to health.

~~

INTERNATIONAL ACADEMY OF ORAL MEDICINE AND TOXICOLOGY

In IAOMT's ongoing examination of the toxicological data on fluoride, the Academy has made several preliminary determinations over the last 18 years, each concluding that fluoride added to the public water supply, or prescribed as controlled-dose supplements, delivers no discernible health benefit, and causes a higher incidence of adverse health effects.

This current policy position by IAOMT confirms those earlier assessments and asserts that there is no discernible health benefit derived from ingested fluoride and that the preponderance of evidence shows that ingested fluoride in dosages now prevalent in public exposures aggravates existing illnesses, and causes a greater incidence of adverse health effects.

Ingested fluoride is hereby recognized as unsafe, and ineffective for the purposes of reducing tooth decay.

The IAOMT performed the task of reviewing fluoride in a comprehensive, scientific and unbiased manner in accordance with criteria established to assure the protection of public safety. The International Academy of Oral Medicine and Toxicology review of fluoride and

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

resulting PHG of zero is the only acceptable systemic exposure level to this common xenobiotic.

http://iaomt.guiadmin.com/wp-content/uploads/article_IAOMT-Fluoridation-Position.pdf

~~

**INSTITUTE OF SCIENCE IN SOCIETY Science Society Sustainability
NO TO FLUORIDATION -**

DENTAL DISEASE INCREASES SIX-FOLD BY FLUORIDATION <http://www.i-sis.org.uk/NotoFluoridation.php>

The only answer EVER was to provide access to affordable dental health care services for all the population, not the dumping/disposal of hazardous waste pollutants and co-contaminants of lead, mercury, arsenic, cadmium, etc., from phosphate fertiliser industries (known as water fluoridation, plus also added is aluminium sulphate) into our drinking water supplies and hence also contaminating our food chain & using the populations' kidneys as hazardous waste disposal/filtration units.

~~

1982 - Former NIH (National Inst. of Health) scientist opposed to fluoride

Statement by James B. Patrick, Ph.D. at the Joint Congressional Committee on Health & Appropriations Against the Inclusion of Fluoridation in the Preventive Health & Health Services Block Grant, Held August 4, 1982.

Dr. Patrick earned his B.S. from the Massachusetts Institute of Technology & his M.A. and Ph.D. from Harvard University majoring in chemistry. His experience as Antibiotics Research Scientist was with the National Institute of Health & Lederle Laboratories.

Dr. Patrick is Senior Professor and Chairman of the Department of Chemistry, Mary Baldwin College, Staunton, Virginia, 1967 to date. He is author of 28 technical papers & holder of 7 U.S. patents.

I strongly advise against the legislature of this Commonwealth having anything to do with fluoridation.

It is a scientific disgrace that a well organized lobby of the American Dental Association ever managed to stampede American legislators into ignoring the highly technical but very cogent objection to fluoridation.

ROYAL SOCIETY'S CHIEF CALLED TO RESIGN OVER FLUORIDATION REVIEW DEBACLE

Tuesday, 16 October 2012, 4:59 pm

Press Release: NZ Fluoridation Information Service

Royal Society's Chief Called to Resign over Fluoridation Review Debacle

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

NZFIS Wellington

11 October 2012

Contrary to the claims that the Royal Society's call for scientific information on fluoridation "did not elicit any new information indicating that a further review would be of value at present" the Society received almost 1000 pages of fully referenced scientific information showing fluoridation to be a significant health risk, as well as being ineffective at reducing tooth decay.

This information included many of the IQ studies recently reviewed under the umbrella of the Harvard School of Public Health, by world-leading scientists in the field of developmental neurotoxicology. The review was published in the leading journal Environmental Health Perspectives, and its findings directly contradict the recent statement by Professor Skegg.

Professor Skegg's statement is simply a "complete fabrication", according to Mark Atkin, CE of the NZ Fluoridation Information Service, who continues "It suggests the real reason the plug was pulled on the Royal Society's review. The Society could not have maintained scientific integrity unless it recommended fluoridation be stopped, given the extensive scientific information we supplied. This would have directly conflicted with Professor Skegg's blind support of public health's entrenched fluoridation policy. Professor Skegg's statement is simply propaganda - a betrayal of science and the statutory role of the Royal Society. Having put propaganda and personal beliefs above scientific integrity, he should resign immediately before he further damages the credibility of the Royal Society."

The claim of "extensive research over many decades indicating fluoridation is [safe and effective]" has been fully discredited by the York Review 2000 and the US National Research Council Review 2006. "Any scientist with any knowledge of the fluoridation issue would know this. There is a saying: 'when a scientist abuses his position in society of trust and authority to mislead the public, he does not become a dishonest scientist - he simply ceases to be a scientist. This blind repetition of propaganda shows that Professor Skegg has ceased to be a scientist', concludes Mr Atkin.

About NZFIS

The NZ Fluoridation Information Service was established in early 2011 to provide accurate and reliable information on fluoridation, in the face of the creation by the Ministry of Health of its lobby group the National Water Fluoridation Support and Co-ordination Service, misrepresenting itself as an objective information service, and the increasing levels of misinformation and propaganda issuing from the Ministry of Health, District Health boards, and the NZ Dental Association.

FLUORIDATION WILL HAVE CATASTROPHIC EFFECTS ON OUR GENERAL HEALTH - SEE THE EFFECTS OF FLUORIDE ON THE THYROID GLAND

By Dr Barry Durrant-Peatfield MBBS LRCP MRCS

MEDICAL ADVISOR TO THYROID UK 9-9-2004

Fluoridation of the nation's water supply will do little for our dental health; but will have catastrophic effects on our general health. We cannot, must not, dare not, subject our nation to this appalling risk.

Dr Barry Durrant-Peatfield

obtained his Medical degrees in 1960 at Guy's Hospital London. He left the NHS in 1980 to specialise in thyroid illnesses drawing inspiration from the work of infamous Dr Broda Barnes, at the Foundation that bears his name, Connecticut, USA.

He has been a medical practitioner for over forty years specialising in metabolic disorders during which time he became a leading authority in the UK for thyroid and adrenal management. For over twenty years he also ran a successful private clinic and became a nation-wide leading authority on thyroid and adrenal dysfunction, but clashed with establishment medicine in the management of thyroid illness. He is the author of *The Great Thyroid Scandal* (see opposite page), he currently lectures at nutritional colleges in London as well as conducting his own teaching seminars. Barry will shortly be opening a diagnostic clinic in the UK for thyroid and adrenal disorders where he will provide advice on diagnosis and treatment with special interests in nutritional aspects. For further information: Dr B Durrant- Peatfield, Surrey.

**STOP FLUORIDE DISEASE - BY ROBERT C. OLNEY, M.D.
REMOVE FLUORIDES FROM FOOD, WATER, AIR AND DRUGS**

Extract: Fluorine is known as a powerful enzyme inhibitor and a poison, thus gradually destroying enzymatic function. This is the same process by which all vital organs are slowly and seriously damaged. The more vital the organ, the more serious the damage. Fluorine is such a powerful, destructive force that it takes only a minute amount to do great damage. This damage is then permanent to the person, and becomes gradually worse due to the accumulation of fluorine in the enzymes. Fluorine appears to be the cause of many mental and physical defects in the newborn.

From the "Archives of Environmental Health" (published by A.M.A.), February 1961, there is an interesting article compiled from authorities all over the world showing the amount of fluorides in diseased tissues. This shows that in some diseased tissues, such as aorta, tumor, cataract, etc., there are fluorides from 39 to 158 PPM compared with adjoining tissues having from 0.0 to 6.9 PPM. This is evidence that fluorine is an important factor in the cause of these diseases.

Doctors Alfred and Nell Taylor, working in the University of Texas and reporting on the effect of fluorine as a cause of cancer, made the following statement: "The terrifying conclusion of the studies was that fluorine greatly induced cancer tumor growth. If doctors and the public can be made aware of this catastrophe, fluoridation shall quickly end. It will some day be recognized as the most lethal and stupid 'Health Program' ever conceived by the mind of man, with doctors and bloodletters not excepted."

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

Dr. Phillip R.N. Sutton, Formerly Academic Associate and Senior Research Fellow, Department Oral Medicine and Surgery, Dental School, University of Melbourne, Author of The Greatest Fraud: Fluoridation (1996):

“We are all affected by this potentially dangerous fraud: The convincing of Governments and people generally that it is ethical, safe and beneficial to medicate, compulsorily, many millions of people throughout their lives with small but uncontrollable doses of a cumulative and very toxic substance because of the notion that it reduces the prevalence of dental decay. All this, although neither its safety nor any scientifically-proved reduction in the number of decayed teeth has been demonstrated.”

'Fluoridation has not been shown to be safe and effective'

Cities in Canada are also abandoning the practice. The most recent are cities like Quebec City, Waterloo, Calgary and Windsor. Those cities finally decided to stop wasting their money on toxic waste (fluoridation chemicals) that not only are no longer effective to prevent decay but are likely harmful to humans and the environment.

Fluoride - The Battle of Darkness & Light by Mary Sparrowdancer © 2003 14 Dec. 2003

It was due to my growing concerns about our country's growing health problems as well as the erosion of our civil liberties that, in November of 2002, I published a paper focusing upon

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

both of these issues and spoke about them on several radio programs. The paper quietly made its way through Washington, D.C., and then around the world.

The paper detailed the "revolving door" in Washington, D.C., an apparent turnstile between private industries and the United States government. Through this invisible door, industry managers pass directly into the very agencies that govern industry - the government's food, drug, agricultural and chemical regulatory departments - in order to influence regulations or speed the approval of their company's products. The paper, "Let Them Eat Anything," showed this unholy alliance, the conflict of interest that has contributed to a mounting epidemic of health problems in the United States. (1)

ALZHEIMER'S DISEASE - Epidemic - Fluoride/Aluminium - By Doug Cross

In addition to the fluorosilicic acid/silicofluorides (hazardous waste pollutants and co-contaminants of lead, mercury, arsenic, cadmium, etc., known as 'fluoride') they also add aluminium sulphate Australia already faces Alzheimer's Disease (& Kidney disease) epidemics - STOP 'WATER FLUORIDATION/Pollution' immediately permanently & irrevocably for all time or face the ruin.

Dementia, including Alzheimer's Disease (AD) is fast becoming the greatest public health issue, ever. In the UK the Alzheimer's Society recently stated that one in three persons over the age of 65 will die from AD - and it's increasing so fast that in thirty years time the prevalence is expected to treble (do the maths and shiver!). Your children will live with fluorosis, but they will die with dementia.

Since the evidence that environmental exposure to ionic aluminium salts, such as the aluminium sulphate used in water treatment, is a leading cause of AD. There is a 50% and 150% increase in AD in areas where the water contains only half the permitted maximum of 0.2ppm. Fluoride in water - increases the speed at which it is absorbed and transferred to the brain. Adding Fluoride To Drinking Water Is Literally Insane. Fluoridation is bad on its own, but in the presence of aluminium its effects are becoming catastrophic as our 'aluminium clocks' tick away the countdown to Alzheimer's - fluoride speeds up that lethal clock..

Brief Extract:

One of the best-known chemical alterations produced by fluorides is a reduction in cholinesterases, including acetylcholinesterase. Fluorides also directly affect the actions of many of other important neurotransmitters in the brain. Fluorides seem to have a special attraction to acetylcholine. Nerve cells that synthesize this transmitter have numerous projections to many forebrain areas, including the neocortex and deeper areas of the brain that provide information to the neocortex. Not only do fluorides change the amount of the acetylcholine in the 7 brain, they selectively block certain receptors that respond to this transmitter. Fluoride reduces the number of one type of "nicotinic receptors" for acetylcholine. Some other nicotinic subtypes are not affected.¹⁰ Added to all of the other alterations in structure and function of the brain caused by fluorides, the opportunity for mental and behavioural changes are almost limitless. While the

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

cholinergic system of the brain has been most studied in regard to the effects of fluoride, it is not the only neural transmitter affected. It is likely that all neural transmitter systems are affected by fluoride intake, directly or indirectly. Other anomalies related to fluoride intake are found in many other chemical systems of the brain.

There is no known benefit of adding any form of fluoride to our drinking water. Who would want to increase chances of having a less than perfect child? Who would wish to take a chance on a possible reduction of their own mental capacity? Who would want to have their personality altered by fluoride induced alterations in their brain chemistry? Who would want to increase their odds of developing Alzheimer's disease? Eliminating the addition of fluoride to our drinking water would remove these possibilities. The cost of doing this is zero. In fact it would enrich the communities now adding fluorides to their drinking water.

THE STRONG EVIDENCE AGAINST THE EFFICACY AND SAFETY OF THE PRACTICE OF FLUORIDATING PUBLIC WATER SUPPLIES CONTINUES TO BE IGNORED BY THOSE CHARGED WITH THE RESPONSIBILITY FOR PUBLIC HEALTH MEASURES.

The disingenuous actions of some scientist advocates of fluoridation and the general antipathy of science journals toward open examination of the subject raises serious questions regarding the objectivity constantly proclaimed for science.

Perhaps the weight of evidence cited by proponents refers to the physical weight of the endorsements and not to a preponderance of scientific evidence.

Suppression of data documenting fluoride's adverse health effects and lack of benefit is widespread

Scientists and professionals have been persecuted, censored, or harassed when they oppose water fluoridation. Unfortunately, fluoride toxicity has been a “faut pas” for many years, and anybody discussing this topic would be suspected to belong to the antifuoridation movement. Thus, the recently published Environmental Health Criteria 36 on Fluorine and Fluorides (WHO, 1989) only superficially discusses chronic toxicity, while beneficial effects and safety margins are dealt with in detail. As Temporary Adviser I was present at most of the Task Group meeting when the document was finalized. In accordance with the official fluoridation policy, information which could cast any doubt on the advantage of fluoride supplements was left out by the Task Group. Unless I had been present myself, I would have found it hard to believe. Thus, I am pleased that you have taken a personal interest in the problems of chronic fluoride toxicity.

Philippe Granjean, M.D. - Professor

Full Information: <http://fluoridation.com/censor.htm>

~~

Dennis Stevenson, a former Parliamentarian and Member of the ACT Legislative Assembly 'Fluoridation Inquiry' (1989-91). The majority of inquiry members would not report the scientific, medical, dental and court evidence received in worldwide submissions proving that fluoridation causes disease, deaths, tooth decay and is useless and environmentally destructive. Dennis put this evidence in a 177 page Dissenting Report, part of this major government report, but longer than the 131 page section which attempted to suppress the evidence.

For over 100 years, science and medicine have understood the poisonous nature of fluoride. In the 1930's and 40's, giant US companies, e.g. ALCOA, were sued for millions of dollars due to toxic fluoride waste escaping from factory smokestacks killing crops and livestock. ALCOA's owners (Mellon) figured that if people could be persuaded fluoride isn't poisonous but is good for teeth, profits could be protected. So, to introduce water fluoridation, they hired the brilliant 'father of propaganda' Edward L. Bernays. Joined later by other fluoride polluting industries (e.g. nuclear) and the multi-billion dollar sugar, toothpaste, confectionary and soft drink industries, they became strong financial supporters of dental associations that promoted fluoridation. One such support group, the Dental Health Education & Research Foundation (DHERF) was founded in Australia in 1962. Its Governors, Members and donors comprised key representatives from Coca-Cola, CSR, Kelloggs, Colgate-Palmolive, Wrigleys, Arnotts, Scanlens, Cadbury Schweppes, etc.

The following 12 points require no expertise in fluoride toxicity, just common sense:....

<http://www.americanchronicle.com/articles/33574>

~~

1997 Auckland New Zealand, Chief Dental Officer Dr. John Colquhoun

Concerning the oft-repeated observation that fluoridation has enjoyed overwhelming scientific endorsement, one should remember that even strongly supported theories have eventually been revised or replaced. From the outset, distinguished and reputable scientists opposed fluoridation, in spite of considerable intimidation and pressure [68, 69].

Most of the world has rejected fluoridation. Only America where it originated, and countries under strong American influence persist in the practice. Denmark banned fluoridation when its National Agency for Environmental Protection, after consulting the widest possible range of scientific sources, pointed out that the long-term effects of low fluoride intakes on certain groups in the population (for example, persons with reduced kidney function), were insufficiently known [70]. Sweden also rejected fluoridation on the recommendation of a special Fluoride Commission, which included among its reasons that: "The combined and long-term environmental effects of fluoride are insufficiently known" [71]. Holland banned fluoridation after a group of medical practitioners presented evidence that it caused reversible neuromuscular and gastrointestinal harm to some individuals in the population [72].

Environmental scientists, as well as many others, tend to doubt fluoridation. In the United States, scientists employed by the Environmental Protection Agency have publicly disavowed support for their employer's pro-fluoridation policies [73]. The orthodox medical establishment, rather weak or even ignorant on environmental issues, persist in their support, as do most dentists, who tend to be almost fanatical about the subject. In English-speaking countries, unfortunately, the medical profession and its allied pharmaceutical lobby (the people who sell fluoride) seem to have more political influence than environmentalists.

Presentation to the SPC for Utilities and the Environment City of Calgary Council Chambers

Wednesday January 26, 2011

Submitted by: Dr. James Beck, MD, Ph.D.

Some of you on the committee have heard me before on fluoridation. I have in the past focused on the questions of effectiveness in preventing cavities and on the adverse effects of fluoride and of hexafluorosalicic acid. I have given reasons, based on peer-reviewed research papers published in credible journals, for concluding that fluoridation is at best minimally effective and definitely harmful to subgroups of the population and possibly harmful to all of us. So in these few minutes I will comment only on the ethical issue.

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

In 1957 the Supreme Court of Canada ruled that fluoridation is “compulsory preventive medication”. The court’s ruling is significant because it legitimizes the common-sense conclusion that we are being medicated and it puts the matter clearly in the realm of medical ethics. Medical ethics in turn is embedded in human rights.

Here is how fluoridation violates the code of medical ethics. It is administration of a drug without control of dosage (controlling concentration in our water is not controlling dose or dosage). It is administration of a drug without informed consent of the recipient. It does not provide monitoring of the effects on the recipient. It is not possible for the recipient to stop receiving the drug (many can not get nonfluoridated water and none of us can avoid exposure from foods and drinks processed where tap water is fluoridated). The drug has not been shown to be safe for human consumption.

Fluoridation of a public water supply is not only an ethical offense against us all, it is clearly a more serious offense against those subgroups of our population which are particularly at risk of harm from fluoride. These groups include infants being fed with formula reconstituted with tap water, diabetics, persons deficient in iodine intake, persons with kidney disease, boys during the eight-year-old’s growth spurt, and others. It is an obligation of city councils and of Alberta Health Services to protect all, not just the average or just the majority.

Several councilors have rightly been concerned about the dental health of children of low-income families. It is said that fluoridation is of particular benefit to poor children. That has been investigated. It is found that the fluoridated poor groups have no better cavity experience than do the nonfluoridated poor groups. Furthermore, it is found that the prevalence of cavities increases as family income decreases. It’s not fluoride that would benefit poor children; it’s a higher standard of living, probably better diet and better oral hygiene.

Now what kind of ethical consciousness allows one to continue to apply a possibly harmful process to unwilling people until there is absolute proof that it is harmful? I have seen this backward approach to safety in government reports on fluoridation. It goes like this: this study that shows association of fluoridation with this harmful effect is not a perfect study; there are weaknesses; therefore we will continue the process until it is shown with certainty that it is harmful. And no further research is recommended; no responsibility to support a better study is accepted. In the presence of a small and dubious benefit such a conclusion, more than being irresponsible, is outlandish.

You don’t have the moral right to do this to us, to one million people. You should stop it now.

James S. Beck, M.D., Ph.D.

Professor Emeritus of Medical Biophysics, University of Calgary

~~

Fluoride: risks and benefits? - Disinformation in the service of big industry

David R. Hill, P.Eng. Professor Emeritus

The University of Calgary

CALGARY, Alberta Canada T2N 1N4

In conclusion, there is a political aspect. People in a free society have a right to choose whether or not they will accept medication, and they have

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

a right to individual treatment and monitoring. Those who believe fluoride works are entitled to their opinion. They may choose their own experts and distrust the proven evidence of legal proceedings in court. They may ignore their own peer-reviewed medical journal reports showing significant and serious risks. That is their right. But they have no right to force others to drink or use fluoride against their will, especially in the face of so much credible evidence of harms, with little or no benefit, and when more effective, democratic and medically responsible forms of medication exist. Nor should they promote the use of fluoride without reference to its dangers.

Portland's Vote Reflects Recent Scientific Findings on Fluoridation's Risks

22 May, 2013

Portland dentist [Dr. Jay Levy, DDS](#), who was active in opposing the Portland fluoridation measure, agreed. "Many dentists I know have the best intentions when it comes to fluoridation, but they just are not aware that the science regarding fluoridation risks has changed so significantly in recent years. For many, the belief that fluoridation is safe is akin to a knee-jerk reflex based on what they learned in dental school, and that's a real problem when you're dealing with public health."

"Across the country, we are seeing people who once supported fluoridation switch their position after spending some time reading the recent studies for themselves and realizing that a practice they long assumed to be safe is far riskier than they thought," says [Michael Connett](#), a researcher with the Fluoride Action Network, the nation's leading organization on fluoridation issues.

"Portland voters chose to protect children from risky fluoridation chemicals. As a community, we stand on the side of science, which clearly shows growing cause for concern about health risks associated with fluorosilicic acid. Anyone can spend an hour on the internet and read for themselves what the National Academy of Science report has to say about fluoride's risks," says Antonia Giedwoyn with the Sierra Club's Columbia Group, which has opposed the Portland fluoridation measure.

Poisoning childrens' milk

<http://www.blackpoolgazette.co.uk/news/education/flouride-plan-for-school-milk-to-target-decay-1-5961467>

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

For an exercise is futility the addition of fluoride to milk takes some beating. Why? Well, fluoride is a poison, and calcium is the antidote to fluoride poisoning - so when fluoride is added to milk, the fluoride is inactivated (forming insoluble calcium fluoride) and is no longer available - calcium fluoride in the diet passes through the body virtually without being absorbed! Pointless? You bet!

So here's a question that you should first ask the fluoride pushers who want to stuff this nasty chemical into highly vulnerable kids, who are already living on the borderline of fluoride overload. If you want to prevent the disease of dental decay, and administer a substance - fluoride - that you claim is effective, then it's a medicine. Yes I know that the EU has said that fluoride is a 'mineral' - but only last week the European Food Safety Agency admitted that there is no nutritive requirement for fluoride - it has no biological function. If you claim that a food has medical properties, it's a medicine, end of story.

So where is the medicinal license that every medicine is required to have? Fluoridated 'dental milk' has NO MEDICINAL LICENSE ! It's illegal to administer the stuff - to kids or anyone else. Asking parents to consent - now why would you want to do that if it's not a medicine? - is like asking them to agree to letting their kids be kicked around by adults in the street - you can't ask them to consent to an illegal act!

So Councils - please wake up to this appalling scam. It doesn't work, it's not licensed for treating a disease, and it's a criminal offense to promote the damned stuff. So send these lunatics packing - ignore the dental lobby, they're not qualified to offer a scientific opinion. Just stop letting them dose the kids with this absurd product and bring back the school dentists instead!

FLUORIDE: THE AGING FACTOR'

Extract:

Dr. John Yiamouyiannis was, until his death in the fall of 2000, the world's leading authority on the biological effects of fluoride. His formal education included a B.S. in biochemistry from the University of Chicago and a Ph.D in biochemistry from the University of Rhode Island. After a year of postdoctoral research at Western Reserve University Medical School, Yiamouyiannis went on to become biochemical editor at Chemical Abstracts Service, the world's largest chemical information center. It was at Chemical Abstracts Service, where Yiamouyiannis became interested in the damaging effects of fluoride.

Chapter 4 - Breaking Down the Body's Glue
All animals, including humans, are made up of cells. The cell, the basic unit of life, can be identified under a microscope by its outer membrane and a nucleus within the membrane.

Some cells are able to produce a protein called collagen. In this book, the term "collagen" refers to collagen as well as collagen-like proteins. This process occurs inside the cell. Little globules called vesicles carry the collagen from the inside of the cell to the cell membrane where it is released to the outside of the cell. There, the collagen thickens into fibers.

The five different types of cells capable of producing and releasing collagen in this way are:
fibroblasts, which produce collagen for the structural support of skin, tendons, ligaments and muscle;
chondroblasts, which produce collagen for the structural support of cartilage;

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

osteoblasts, which produce collagen for the structural foundation and framework upon which calcium and phosphate are deposited, giving rise to bone;
ameloblasts, which produce collagen for the structural foundation and framework upon which calcium and phosphate are deposited, giving rise to tooth enamel.
odontoblasts, which produce collagen for the structural foundation and framework upon which calcium and phosphate are deposited, giving rise to the inner part of the tooth. This material is called dentin.

Like other proteins, collagen is composed of amino acids linked together in a chain. However, collagen contains two additional amino acids, hydroxyproline and hydroxylysine, not found in other proteins. Thus when collagen breaks down, the hydroxyproline and hydroxylysine levels in the blood and urine increase.

Researchers from Harvard University and the National Institutes of Health knew in the 1960s that fluoride disrupted collagen synthesis. It was not until 1979-1981, however, that a new flurry of research activity in this area began. End Extract <http://www.fluoridealert.org/aging-factor.htm>

**THE ARTHRITIS TRUST OF AMERICA ON "FLUORIDE"
FLUORIDATION: GOVERNMENTALLY APPROVED POISON
THE RHEUMATOID DISEASE FOUNDATION**

The City Commissioners turned to me, and asked my opinion. Being somewhat naive and sans research, I agreed with the nurse, and so together we naively, innocently, and stupidly added fluoride to the City of Fairview's (Tennessee) water supply, and that addition continues to this date, despite the fact that the citizens of the City of Fairview, TN have never had an opportunity to know the pros and cons of fluoridation or to vote for or against the issue.

We unknowingly doomed hundreds of Fairview citizens to Arthrosis, vertebral and hip fracture, osteosarcoma (cancer), infertility, birth defects, bone damage, damage to the immune system, fluorosis, fluoride neurotoxicity, and many other poorly diagnosed conditions, as fluoride affects every human system, often by inhibiting enzymes which are essential for the functioning of every human system.

Besides the damaging of human tissue by 1 ppm of fluoride added to our public water systems, the health problem is also one of massive over-consumption of fluoride. We are being bombarded with fluoride from all our dental products and also many industrial sources.

**Fluoride, Gingivitis & Oral Cancer**

© 2002 PFPC

Summary:

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

Gingivitis and periodontal disease are the oral diseases requiring most urgent intervention. Over 90% of the U.S. population over 13 is affected. Strong links have been made to heart disease and low birth weight and infant mortality. For heart disease the association with gingivitis is stronger than the one for smoking or high cholesterol. As heart disease is the #1 killer in the US, many efforts are undertaken to reduce this alarming figure. In Canada large pictures of a diseased heart are placed on cigarette packs alerting to the fact that smoking causes heart disease.

It is of great importance that warning labels and pictures of periodontal disease, oral cancer, diseased hearts, pituitary and thyroid glands, as well as Alzheimer's brains – just to name a few – are placed on all oral care products containing fluoride.

Why?

Patents by the pharmaceutical company Sepracor disclose that concentrations of fluorides from fluoridated toothpastes and mouthwashes activate G proteins in the oral cavity, thereby promoting gingivitis and periodontitis, as well as oral cancer. Incomprehensibly, this vital information is being withheld from the public by all parties involved, including the company, at least two well-known Universities, and numerous oral disease experts. THIS INCLUDES A MUCH-DECORATED ADA SCIENTIST WHO WAS INVOLVED IN SETTING THE CDC RECOMMENDATIONS FOR FLUORIDE INTAKE IN CHILDREN, SERVED AS HEAD OF A FOOD AND DRUG ADMINISTRATION SUBCOMMITTEE THAT DECIDES WHICH DENTAL PRODUCTS TO MAKE AVAILABLE TO THE PUBLIC, AND WHO CHAIRED THE PANEL ON SAFE USE OF FLUORIDE FOR THE CENTERS FOR DISEASE CONTROL . ## **FLUORIDATION: A HORROR STORY**

By Wade Frazier

Brief extract: In the fluoridation issue, the same conflicts of interest and corruption that pervade organized medicine are clearly seen. The AMA has never had much to do with promoting the public's well being, instead promoting cigarettes and helping to cover up health disasters. That dynamic can also be found in the American Dental Association (ADA), where its financial relationship with candy companies is similar to the relationship the AMA had for generations with the tobacco interests. In 1995, the ADA received 15% of its money from trade groups such as the Sugar Association, Coca-Cola, and M & M. The ADA actively promotes compulsory fluoridation. The ADA was also guilty of stating that the ACLU endorsed fluoridation when it in fact did not.[34] Since 1993, the ADA has had to drop many organizations from its list of fluoridation supporters, including the EPA.[35]

The Case Against Fluoride How Hazardous Waste Ended Up in our Drinking Water and the Bad  
Science and Power Politics That Keep It there by Paul Connett, Phd, James Beck, MD, PhD, H.S.  
Micklem, DPhil

Quote from **Albert W. Burgstahler, Phd., Professor Emeritus Of Chemistry, The University Of  
Kansas**, Editor, Fluoride Research [www.fluorideresearch.org](http://www.fluorideresearch.org)

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

It is my hope that this book *The Case Against Fluoride How Hazardous Waste Ended Up In Our Drinking Water And The Bad Science And Powerful Politics That Keep It There* by Paul Connett, PhD, James Beck, MD, PhD, H.S. Micklem, DPhil, will enable good science to prevail over dogma on this issue. This is important not only to end a significant health threat to fluoridated populations but also because it is critical for a civil society to be informed by honest science. This change can occur only if enough people – especially new generations of scientists, doctors and dentists – want it to happen.

**THE CASE AGAINST FLUORIDE HOW HAZARDOUS WASTE ENDED UP IN OUR DRINKING WATER AND THE BAD SCIENCE AND POWERFUL POLITICS THAT KEEP IT THERE** by Paul Connett, PhD, James Beck, MD, PhD, H.S. Micklem, DPhil

Extracted from Page 124 The Evidence of Harm

Heading ANIMAL STUDIES

There are many animal studies of fluoride's impact on the bone and brain, as well as on the endocrine and reproductive systems. These are discussed in subsequent chapters along with some important human studies.

### **FARM AND DOMESTIC ANIMAL STUDIES**

Normally, when we talk about animal studies, we are thinking about animals used in lab studies, like rats, mice and guinea pigs. However, in the history of fluoride pollution (see chapter 9) the fluoride poisoning of farmyard animals has been of great concern. Grazing cows have literally been brought to their knees by fluoride emissions from aluminum smelters.

One of the pioneers in researching the IMPACTS OF FLUORIDE on farmyard animals was DR. LENNART KROOK, A VETERINARY PATHOLOGIST at Cornell University. Dr. Krook passed away in April, 2010. One of his last studies involved investigating the mysterious illnesses affecting a number of quarter horses on Cathy and Wayne Justus' farm in Pagosa Springs, Colorado. Some of the horses died. It was only when Cathy and Wayne Justus changed the horses' water supply that the symptoms of the remaining animals began to clear up. Dr. Krook was able to show that the likely cause of the horses' ailments was fluoride. This event led to the halting of fluoridation in Pagosa Springs. A very disturbing videotape of these horses can be viewed online. The Justus and Krook study was published in the journal *Fluoride* in 2006.

The problem for both cows and horses is that they drink very large quantities of water, so should they be exposed to fluoridated water, their fluoride exposure can be very high indeed.

### **ANOTHER ANIMAL THAT MIGHT BE VERY SENSITIVE TO FLUORIDE IS THE DOG.**

The dog is one of the few animals that succumbs to osteosarcoma, and larger dogs commonly lose strength in their rear legs.

Fluoride is known to cause arthritic-like symptoms and is suspected of causing osteosarcoma in both rats and humans (see chapter 18). With the possibility that dogs are getting high levels of

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

fluoride in pet food, especially pet food that contains bonemeal, there is a very real chance that fluoride may be the causative agent for these conditions. These speculations need to be investigated.

#### SUMMARY

The chemistry and biochemistry of fluoride and its kinetics in the body, are such that fluoride can function as a cumulative poison when small amounts are ingested over a long period by drinking fluoridated water. Fluoride circulates in the blood and accumulates in calcifying tissues, which include the bone, the teeth, and the pineal gland. It can inhibit the function of a variety of enzymes in vitro ('in vitro' literally means 'in glass' and is used to indicate an experiment performed outside the whole body). Also in vitro, in combination with traces of aluminum, fluoride can interfere with G proteins, used by many water-soluble messengers, such as hormones and growth factors, to deliver their messages to the inside of the cells of tissues they help regulate. Although more difficult to prove, it is reasonable to assume that many of the effects seen in vitro can occur in the whole body. END EXTRACT

Water Fluoridation an absolute fraud and failure:-

Australia in dental crisis after widespread fluoridation Australia wide for decades first commencing Beaconsfield Tasmania in 1953 (also in dental crisis and chronically diseased) and USA also in dental crisis after up to 67 years of water fluoridation/pollution first commencing Grand Rapids, Michigan in 1945 (also in dental crisis - Kentucky USA 100% fluoridated also in dental crisis and chronically diseased). It's a no-brainer - dangerously corrosive hazardous waste pollutants & co-contaminants have no place being disposed/dumped into the peoples' water supplies and hence also contaminating/polluting our food chain. All water fluoridation (pollution) must cease immediately & irrevocably for all time.

27th February, 2013 - Tasmania will receive an extra \$12 million from Federal Government to reduce public dental waiting lists. <http://www.abc.net.au/news/2013-02-27/extra-dental-dollars-to-reduce-waiting-lists/4542450?section=tas>

Can Dentists & Doctors be trusted when they say Water Fluoridation is Safe & Effective?

<http://fluorideinformationaustralia.files.wordpress.com/2013/10/can-dentists-doctors-be-trusted-when-they-say-water-fluoridation-is-safe-effective.pdf>

The only answer EVER was to provide access to affordable dental health care services for all the population, not the disposal of hazardous waste pollutants and co-contaminants known as water fluoridation; into our drinking water supplies and hence also the contamination of our food chain and using the populations' kidneys as hazardous waste disposal/filtration units.

~~~~

### **Civil Rights Violation Regarding Forced Medication**

extract:

WHEREAS, the proponents of fluoridation promised a safe and effective dental health additive, but the San Antonio Water System's (SAWS) contract for fluoridation chemicals proves a "bait and switch"; as SAWS is adding the toxic waste by-product of the phosphate fertilizer industry, that has no warranty for its safety and effectiveness for any purpose from the supplier (PENCCO, Inc.) or the source (Mosaic Chemical); and

THEREFORE, BE IT RESOLVED, that LULAC commends efforts by organizations that oppose forced mass medication of the public drinking supplies using fluorides that are industrial grade, toxic waste by-products which contain contaminants (arsenic, lead, mercury) which further endanger life; and

BE IT FURTHER RESOLVED, that LULAC supports efforts by all citizens working to stop forced medication through the public water system because it violates civil rights;

and

BE IT FURTHER RESOLVED, that LULAC opposes the public policy of fluoridation because it fails to meet legislative intent;

and

BE IT FURTHER RESOLVED, that LULAC demands to know why government agencies entrusted with protecting the public health are more protective of the policy of fluoridation than they are of public health.

Approved this 1st day of July 2011.

Margaret Moran

LULAC National President

[http://lulac.org/advocacy/resolutions/2011/resolution\\_Civil\\_Rights\\_Violation\\_Regarding\\_Forced\\_Medication/](http://lulac.org/advocacy/resolutions/2011/resolution_Civil_Rights_Violation_Regarding_Forced_Medication/)

~~

**"As a former city councilwoman,** I was instrumental in investigating my constituents complaints about the harmfulness of water fluoridation. As a result I helped in getting an initiative to the ballot and we successfully voted in a moratorium on Nov 6, '12 to turn off the toxic industrial waste fluoride (HYDROFLUOSULFIC ACID OR HFSA) because our supplier UNIVAR, (formerly Basic Chemical Solutions) would not provide three things: 1.) Toxicological report 2.) Listing of contaminants 3.) Proof that their product was safe for all water consumers, infants to seniors. This absurd practice of adding HFSA is based more on politics than science. Why should a water department be given the power to medicate anyone when they don't take a health history, they don't pass out a listing of side effects or monitor the dose. This is tantamount to gross negligence. Water consumers started to send in their payment UNDER PROTEST so that when the class action lawsuits begin they would be covered. After adding water fluoridation for 44 years, our town had 70% cavities in our childrens' teeth,(this figure was quoted from Dr. Susan Wellman, dentist who is pro-fluoride) high obesity rates and low test scores. Hardly an endorsement for continuing this unethical practice. We were also ranked 34th in the nation for cancer while Brookings, Oregon..... just 25 minutes north of us... was ranked 765th in the nation for cancer for the same time period and Brookings never fluoridated their water.

We have high rates of not only cancer, but thyroid, diabetes and kidney disease all with links to HFSA. One constituent ended up in ER with seizures after showering for 10 minutes. Her doctor has subsequently written a letter describing her allergic reaction to water fluoridation. She was on a medication which contained fluoride and that in combination with absorbing this poison transdermally by showering put her in the Emergency Room. New Hampshire Governor Lynch signed into law on Aug 4, 2012 infant warnings concerning mixing fluoridated water with formula because of the high prevalence of fluorosis. Fluorosis is the first visible sign of fluoride poisoning. Our Environmental Protection Agency announced in early 2011 that 41% of our nations teenagers had fluorosis and recommended cutting the parts per million down to .7. Our city council reduced the ppm from 1.2 to .7. That was a step in the right direction but not nearly enough because our EPA is doing nothing to really test or protect the public from this toxic industrial waste product.

The only safe level when considering the addition of HFSA to drinking/bathing water is ZERO.

The State of Kansas, has successfully entered House Bill 2372 on January 18, 2013 listing the harm of water fluoridation. If passed, Kansas will become the first fluoride-free state in the United States.

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

If you happen to call the NSF (which is not a government agency) and ask them questions about the testing they do on HFSA, they will tell you that they won't provide that information because of non-disclosure agreements. If you call the manufacturer, distributor or supplier, they will not provide information about the 3 requested docs listed in my opening paragraph above as I already did that back in 2011. I sent out over 40 letters and got zero responses.

I predict that water fluoridation will become one of the biggest frauds and scams ever perpetrated against the public in the 20th and 21st century. That phrase often quoted by the CDC as being one of the best things since sliced bread was made up by a Public Relations guy. It's time to stop quoting that drivel. Water fluoridation will be compared to Tobacco science, DDT science, Asbestos science, Thalidomide science, etc. It is my opinion based on the research I've done which has been extensive these last 5 years, that it's all about the money. Some brilliant schemers came up with this idea to get rid of toxic industrial waste by saying it was good for children's teeth. That's a bunch of baloney. It's good for the bank accounts of the producers of HFSA because if they had to get rid of their toxic industrial waste legally, it would cost them hundreds of millions of dollars.

Instead they dupe the politicians with fraudulent science and endorsements which is not science and sell them a product in which humans are utilized to filter this poison through their bodies while 99% goes down the drain. The dumb politicians buy it hook, line and sinker and shut their brains down. They become incapable of independent thought as I witnessed first hand with my fellow council members and other councils I've visited. But the HFSA manufacturers, suppliers and distributors are laughing all the way to the bank because they've got these municipalities paying them for poison. Plus, I checked out our retirement accounts and lo and behold, the MOSAIC company is one of the funds city employees can invest their retirement money in. Again, as I said, brilliant scheme from start to finish. I just hope to see the day that some of them end up in prison.

But here's the part they don't tell you. In 2011, our city finished a \$43.8 million upgrade/expansion on our waste water treatment plant with state-of-the-art technology that utilizes MBR or Membrane Bio-Reactor technology. When I asked our Public Works Director if this gets the fluoride out of the water, he replied, "NO." So this poison is going into our Pacific Ocean. Poison the public. Poison the oceans. Poison the food and beverages. Because of that, we are all already over-fluoridated. Please do your homework.

Respectfully, Donna A. Westfall, Former City Councilwoman, Crescent City, Calif."

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

***Corporate 'sponsorship' of our Dental Schools in Australian Universities is (allegedly) like leaving the wolves to mind the lambs. Allegedly, this is a most serious conflicts of interests and complete loss of ethics and integrity.***

The informed and independently researched/unbiased members of the population are sick of the fact that for decades the Fluoridation Lobby remain so politically and media powerful - and that's the only way these dangerously corrosive hazardous waste pollutants fluorosilicic acid/silicofluorides and co-contaminants of lead, mercury, arsenic, cadmium etc., (known as water fluoridation chemicals) (also added is aluminium sulphate) continues to be disposed of into our drinking water supplies and hence also contaminating our food chain - the truth never gets to the people by way of headlines in a totally controlled corporate mainstream media - this is appalling.

Also many of the population are still unaware because authorities lie and say the 'fluoride' is natural - this is absolutely deceptive and a cover-up.

Hereunder, is what they are consuming in their water, of course it's all through the food chain, and they bath their babies, children, themselves and their pets in these hazardous waste pollutants - it is insane and Australia's disgrace, that we the population, pets and environment are deliberately, forcibly, recklessly, wilfully and arrogantly polluted with this hazardous waste known as water fluoridation.

All thinking people must ask, who in their right minds would force an entire population to consume this in everything we eat, drink and bathe in, also ask why would Dentists and doctors fight to the death to enforce this pollutant on us all and our environment if as they say it is effective at reducing dental decay by between 30 and 60% thus reducing their income. What BS ! They say it is safe and effective and Australia wide and USA all in dental crisis after decades of the poison fluoridation commencing firstly in Australia 1953 and USA in 1945.

"Physiologic Conditions Affect Toxicity of Ingested Industrial Fluoride," Journal of Environmental and Public Health, vol. 2013, Article ID 439490, 13 pages, 2013. Richard Sauerheber, doi: 10.1155/2013/439490. Available online at: <http://www.hindawi.com/journals/jeph/2013/439490/>

Fluoridation = What you are drinking, bathing in and it's all through the food chain:-

~~

## **Fluoride toothpaste was registered as a S5 poison -**

The N.H.M.R.C. in their book "The Effectiveness of Water Fluoridation" p.131., explained the need to examine poison regulations concerning fluoride toothpaste which was registered as an ' S5 POISON' as printed on the package. The Answer by N.H.M.R.C. **Fluoride Toothpaste an S5 poison was reclassified as "Cosmetic for sales regulations".**

**Here we have the Australian Government's professional and honest sorcery of changing an S5 POISON into a safe benign product by altering its scientific health category into a cosmetic by reclassification! All S5 POISON LABELS on fluoride toothpaste were removed, not for your health reason, no, it was to help commercial SALES that superceded the health and rightful Government protection of Australian people.**

[http://home.vicnet.net.au/~fluoride/2005/scientific\\_foibles\\_of\\_fluoride.htm](http://home.vicnet.net.au/~fluoride/2005/scientific_foibles_of_fluoride.htm)

<http://home.vicnet.net.au/~fluoride/>

~~

**Also let us clarify something regarding FLUORIDE ACTION NETWORK** (Professor Paul Connett) website [www.fluoridealert.org](http://www.fluoridealert.org) - FAN seeks to broaden awareness about the toxicity of fluoride compounds among citizens, scientists, and policymakers alike. FAN not only provides comprehensive and up-to-date information, but remains vigilant in monitoring government agency actions that impact the public's exposure to fluoride.

I am sure many will be disturbed by the actions of the ADA and when this first happened some years ago, it certainly was disturbing to all Truth Seekers; the lengths to which some pro-fluoride fanatics go, in this case, please note that after Fluoride Action Network and the dot org domain was originally secured (fluoridealert.org ) and before Fluoride Action Network could secure the domain name fluoridealert.com - that the American Dental Association (allegedly) deviously many say, swooped in and 'nicked' the fluoridealert.com domain name of Fluoride Action Network's fluoridealert.org

So to re-clarify this 'interesting' piece of pro-fluoride 'manoeuvring'/deception by the ADA:-

Fluoride Action Network Professor Paul Connett [www.fluoridealert.org](http://www.fluoridealert.org)  
American Dental Association (who allegedly) 'nicked' the dot com [www.fluoridealert.com](http://www.fluoridealert.com)

I guess that's a pretty effective way to impede people and researchers getting truth !

~~

**News regarding the disgraceful conflict of interests of VICE-President of British Fluoridation Society** from Doug Cross UK Councils Against Fluoridation <http://www.ukcaf.org>

The hasty resignation of Andy Burnham from the British Fluoridation Society does not signal a retreat over the imposition of water fluoridation.

Doug Cross UKCAF 15th June 2009

The appointment of Andy Burnham, MP, Vice-President of the British Fluoridation Society (BFS), as Secretary of State for Health has revealed to the public just how dangerously out of touch the Prime Minister has become with public concerns. The revelation of Mr Burnham's close relationship with the BFS on Tuesday last, apparently undisclosed in the Parliamentary Register of Members' Interests, led to the immediate announcement of his resignation from the BFS.

But he came bouncing back, unapologetic and fighting mad, with an outburst of brazen aggression that will surely have shaken any health professional who lives by the ethical code underlying the practice of medicine. At the National Health Service Confederation's annual conference in Liverpool Mr Burnham said that the Government had been too timid at times on the public health agenda, and exhorted the delegates to ignore public opposition to water fluoridation, saying " don't feel you have to wait for permission to invest in prevention . . . Let's press ahead with fluoridation of water supplies, given the clear evidence that it can improve children's dental health."

Website and pdf file available here:- [http://www.ukcaf.org/a\\_conflict\\_of\\_interest\\_andy\\_burnham\\_quits\\_bfs.html](http://www.ukcaf.org/a_conflict_of_interest_andy_burnham_quits_bfs.html)

'A Brief Primer' on water fluoridation/pollution - Diane Drayton Buckland - 8 Oct. 2013

### **Australian Fluoridation Dictatorship ADA, AMA**

The ADA asked for \$200,000 and received \$220,000 from Bligh's Health Minister, Stephen Robertson to promote 'fluoridation' and their colleagues at the AMA sent a letter to Dr. Jeannette young, Chief Health Officer Queensland Health extract from FOI :-

**"The AMA believes the 'strategic approach' referred to in your letter must be for Government to mandate water fluoridation throughout the State. The approach to encourage individual councils to adopt fluoridation of their own volition has failed."**

These letters from ADA and AMA form part of this Report and can be accessed on the link <http://fluorideinformationaustralia.files.wordpress.com/2013/01/report-water-fluoridation-pollution-must-end-diane-drayton-buckland-independent-researcher-14th-january-2013.pdf> referred to page 88/89.

Many view this allegedly, as tantamount to 'conspiring' to 'mandate' 'water fluoridation' and all water fluoridation (pollution with hazardous waste) should be banned urgently and irrevocably.

Can Dentists & Doctors be trusted when they say Water Fluoridation is Safe & Effective?

#### **The Girl Against Fluoride Independent Researcher and Activist - Ireland –**

Professor Denis O Mullane is Vice Chairperson of the Executive Committee of the Irish Expert Body of fluorides & health. Although he calls himself "an independent objective research worker in the field of Dental Public Health", this man has promoted water fluoridation around the world for many years. He has pushed water fluoridation in South Africa along with Seamus Hickey. Despite Mr Mullane's pro fluoride bias, in 2002 Michael Martin gave him a grant estimated at a million to investigate the benefits and risks of water fluoridation.

**The British Fluoridation Society** includes Denis Mullane in their information leaflets. He is also connected with the British Nutrition Foundation - this was set up in the 1960's by sugar & pharmaceutical companies such as Tate and Lyle ltd, Cadburys, Proctor & Gamble. Denis Mullane's uncle was chief chemist of Irish Sugar Company.

Mr Mullane is part of a group rewriting a document on "Fluorides and Oral Health", for the WHO. This is one of the men who continues to say that water fluoridation is safe & yet the chemicals used in water fluoridation in Ireland were banned for their use as a wood preservative.
